Change Alignment type to 16 Points **Click OK**

- Select **Edit – Find Whiteboard**
- Select **Check All** – If you have a USB board, it will also appear here

- Select the port where the whiteboard is found and select **OK**
- Select **Edit – Projection**

Depending on the board used, it will either automatically calibrate using a lot of flashing lights or you will have to manually calibrate touching the corners of the shapes displayed on the whiteboard in an anticlockwise direction. 4 on first screen in a large square. 4 on second screen in a small square. Then 8 on the octagon on the last screen.

Install the Easiteach software and other software provided (Handwriting recognition etc)
